

Overview

LET'S LEARN LATIN will introduce elementary and middle school teachers to the world of Latin and the ancient Romans through a variety of engaging approaches.

Teachers get to play the role of students, learning the material through the same activities and lessons that they will be able to use in their own classrooms.

Participants will enjoy learning the basics of Latin, using a colorful, interesting, kid-friendly text called Minimus, supplemented by effective and innovative activities to practice the material. **No previous experience with Latin is needed!**

Participants will receive myriad classroom-ready materials on all topics studied.

Curriculum

The workshop will lead participants through 50% or more of the Minimus text, giving participants the skills and confidence they need to continue their study independently.

This work at the workshop will prepare participants to knowledgeable and confidently teach their students about the following aspects of the ancient Roman world:

- * basics of the Latin language
- * grammatical connections between Latin and English
- * Latin vocabulary and word roots
- * culture and mythology

Why Latin?

Chief benefits of Latin to students: Students will better understand English vocabulary and grammar, the workings of other world languages, and the roots of Western civilization.

Connections to standards: We recognize that for the teaching of Latin and Classical Studies to be effective and feasible, it must be integrated with state standards. Participants will learn about connections to the standards, and other techniques of incorporating these topics into today's busy classrooms.
